Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 4-30, 32-41, 44-48, 50 and 51 rejected under 35 U.S.C. 102(b) as being anticipated by EP 0 723 214 to Goossens et al.

Goossens et al. shows a controller 2; buffer reservoir 50; chemical output 70; main reservoir 52; valve DV1; load cell 54; supply line 71, 68; valves V5, V6; delivery means 51; first gas line 72; second gas line 74; gas source 55; vacuum source 57; gas valve V15; first measuring means 56; first delivery means 60-66; first and second pressure regulating means P1 and P2, respectively; the valves are the sealing means; the refill means are the buffer and its control; the signal generating and detecting means are discussed in paragraph 30; and the trend identifying means as the computer and controller.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Art Unit: 3754

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 31 and 49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goossens et al.

Goossens et al. shows all claimed features as discussed above, but lacks the multiple chemical receiving means and the flexible connecting means. It would have been obvious to provide multiple chemical receivers in order to be able to dispense mixtures of various substances. Further, making the connectors flexible is an obvious way to be able to place the components in multiple positions.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph A. Kaufman whose telephone number is (571) 272-4928. The examiner can normally be reached on Monday-Thursday, 5:30AM-2PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Shaver can be reached on (571) 272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
